LIVER CANCER: KEY FACTS

Risk Factors:

Chronic liver diseases like cirrhosis and hepatitis B or C are leading causes.

Symptoms to Watch:

- Persistent abdominal pain
- Unexplained weight loss
- Jaundice (yellowing of skin and eyes).

Early Detection Matters:

Regular screenings improve treatment success.

Treatment Options:

Surgery, liver transplantation, and advanced therapies like immunotherapy.

Prevention:

Hepatitis B vaccine, healthy lifestyle. Act early for better outcomes!

BRAIN PACEMAKER: REVOLUTIONIZING MOVEMENT DISORDER TREATMENT

Who Is It For?

Best suited for patients whose conditions don't respond to medication, such as advanced Parkinson's and essential tremor.

How Does It Work? Electrodes implanted in the brain suppress uncontrolled movements, restoring quality of life.

Take Note:

A brain pacemaker empowers you to live life on your terms!

Benefits:

Enables patients to return to their social lives and regain daily independence.

Prof. Mete Karatay, MD
Neurosurgery

NEW BREATH IN ASTHMA TREATMENT WITH STEM CELLS

Stem cells repair damaged airways and alleviate the effects of asthma.

An effective solution, especially for patients unresponsive to conventional treatments.

They reduce inflammation, balance the immune system and ease breathing.

This groundbreaking approach offers a healthier life for asthma management.

MIRACULOUS **LIV**ES

SEVERE SPINAL DEFORMITY AND BREATHING DIFFICULTY TREATED WITH A SINGLE SURGERY

A 19-year-old patient, suffering from severe spinal deformity and breathing difficulties, was informed by other doctors that surgery was not possible and that living with the current condition would be necessary. After detailed examinations conducted by our Spinal Surgery Clinic, scoliosis surgery was performed using the osteotomy method. The surgery was successfully completed and the patient was discharged within a week, returning to the home country on the 15th day after the procedure. This case marked a life changing and hopeful step forward for the patient.

A MONTH TO EMPOWER: CERVICAL CANCER AWARENESS

Early Detection Saves Lives

Regular screenings are key to detecting cervical abnormalities at an early, treatable stage. The Pap smear, in particular, helps healthcare professionals identify and address pre-cancerous changes before they progress.

A DELIGHTFUL VISIT TO OUR HOSPITAL!

At Liv Hospital, we had the pleasure of hosting Dr. Boukerdous Selma, a distinguished guest from Algeria who is both an influencer and a gynecologist. During her visit, she toured our hospital, explored our advanced medical technologies and experienced our patient-centered approach to healthcare. She also engaged in a valuable exchange of knowledge with our physicians.

During the visit, we introduced Dr. Selma to the hospital's high-quality standards and innovative practices, showcasing our commitment to excellence in healthcare.

ISTANBUL & BAKU PHYSICIANS' HEALTH FRIENDSHIP MEETING

The "Physicians and Health Friendship Meeting" was organized to strengthen healthcare collaboration between Azerbaijan and Türkiye under the auspices of the Consul General of Azerbaijan, Narmina Mustafayeva.

This gathering aimed to enhance healthcare relations between the two countries and foster knowledge-sharing among professionals. Held under the patronage of Consul General Narmina Mustafayeva, the event sought to reinforce international medical cooperation and facilitate the exchange of expertise.

SUPPORTING THE EMPOWERMENT OF WOMEN!

MLP Care has reaffirmed its commitment to gender equality and supporting women in the workforce by signing the Women's Empowerment Principles (WEPs). CEO Muharrem Usta emphasized that the healthcare sector relies heavily on women's contributions, highlighting the direct correlation between the development of women and the progress of society. MLP Care actively provides equal opportunities for women, supports their legal rights and freedoms, and contributes to society through initiatives focused on protecting women's health.

RECOGNITION FROM THE KOSOVA PEDIATRIC SURGEONS SOCIETY

At Liv Hospital, we take great pride in the international achievements of our physicians.

Prof. Selami Sözübir, MD, recognized for his contributions to pediatric surgery, was honored during the **20th Anniversary of the Kosova Pediatric Surgeons Society** at the **2nd Albanian Symposium of Pediatric Surgery**.

As Liv Hospital, we congratulate our esteemed physician for his dedication and impactful contributions to the medical field and wish him continued success.

ADVANCING RADIOLOGY

Dr. Abibullayeva Kazyna and Dr. Kairat Murzalin from Kazakhstan took part in the Advance Radiology observership program from January 19th to 24th, 2025. This program provided them with a valuable opportunity to dive into advanced radiological techniques, including Stress MRI of the Heart, DWIBS, Pancreatic Tumors and Interstitial Lung Diseases. Over the course of the week, they gained valuable insights by observing a variety of radiological procedures, deepening their knowledge and refining their expertise in the field of radiology.
