# BREAKTHROUGH HEALTHVERSE INVENTION IN THE HEALTHCARE INDUSTRY FROM LIV HOSPITAL

Liv Hospital, which has implemented a technology that will make a breakthrough in the sector, introduces you to the healthverse project. With this project, our guests can have the opportunity to find out about the latest technology treatment methods with the virtual tour offered, without the need of being present in the hospital.

# LIV HOSPITAL STARTED TO PROVIDE **SERVICE IN ITS NEW OFFICE** **AT THE ISTANBUL AIRPORT**

Liv Hospital is now offering service in its new office at the Istanbul Airport. While our guests are resting after the trip, they will be able to get information about our hospital. We are waiting for our guests to our office, which provides service 24/7 in our secure area. We welcome our guests in our office.

# INNOVATIVE APPROACHES IN AESTHETIC

Our perception of aesthetics and beauty started to open new doors with the developing technology. Innovative formulas of looking healthy and beautiful were discussed at the Aesthetics Congress of Innovation Approaches, which was held by Liv Hospital Vadistanbul branch on March 17-18, 2023.

# THINGS TO KNOW ABOUT CORNEAL TRANSPLANTATION

## **What is Cornea Transplantation?**

Cornea transplantation is the replacement of the cornea tissue (the transparent tissue on the front of the eye). As this tissue owns the features of a lens, it is of great importance not only in terms of its transparency, but also its optical features for the eye to maintain a clear vision. Cornea transplantation is deemed necessary when your vision is impaired stemming from cases such as corneal edema (blurred vision), deformation or stain formation due to various illnesses.

## **How is a Cornea Transplant Performed?**

It is performed in two different methods: penetrating/penetrant (replacement of all corneal layers) and lamellar (replacement of only the diseased layer). Lamellar keratoplasty has been increasingly performed over the last years because the main purpose is to preserve the original form of the tissue, if it is not distorted. Lamellar keratoplasty options include Anterior Lamellar (replacement of the front cornea tissue) and Posterior Lamellar (replacement of the back cornea tissue).

## **Is Laser Application Used in a Cornea Transplant?**

Laser application has been increased in the last years. Although it is not very common yet, it can be used in the operations of suitable cases. Femtosecond laser is used in cornea transplant. It provides great advantage especially for the patients undergoing anterior lamellar keratoplasty.

## **What is the Reason for Cornea Transplant?**

Cornea transplantation can be performed due to four purposes. The first and the most crucial one is optical reasons. The second and comparatively rare reason is the disruption of the eye integrity, which is also called tectonic. The third reason is to treat infections. Lastly, it can be performed in order to provide an aesthetic appearance to the dark grey layer caused by cornea layer of people with little or no vision.

# NOWRUZ CELEBRATIONS AT LIV HOSPITAL

The arrival of spring was celebrated with the Nowruz Event in Liv Hospital Ulus and Vadistanbul. The interest of our guests from Azerbaijan, Kyrgyzstan, Uzbekistan, Kazakhstan was intense. The participants enjoyed the traditional themed event with traditional foods and decorating.

# LIV HOSPITAL AT TRUST LONDON HEALTH TOURISM FAIR

On 23rd of March, International Team members of Liv Hospital has attended to Trust London Health Tourism Fair Organization which was held in UK, London.

The purpose of this organization is to bring together the target medical tourism companies/agencies with service providers and meet the expectations of both parties. We have made connection with more than 30 agencies and learned about their areas of interests and working strategies.

Images and documents related to the corporate promotion of our hospital were shared with the relevant companies and negotiations were started for cooperation.

# "EVERYWHERE IS BEAUTIFUL WITH WOMEN"

On this occasion of International Women's Day, Liv Hospital management celebrated this beautiful day by gifting flowers to female team members with the message "The world is a better place with women in it"

*Message from Liv Hospital  
for Women's Day*
